## Summary

**Summary** — Experienced **Back-End Developer** with 8+ months of expertise in **Django**, specializing in **RESTful API development**. Skilled in building efficient, scalable back-end systems, database management, and integrating third-party services. Proficient in writing clean, maintainable code and optimizing performance.

## Skills

**Languages -** Python , Core Java , HTML , CSS , Javascript
**Frameworks -** Django Rest Framework , React
**Databases -** SQL , SQLite, PostgreSQL

**Tools -** Postman (API Testing Tool), VS Code (Code Editor), Git/GitHub

## Experience

**Qubitnets Technologies**                                                    Aug 2024 – Jan 2025
*Backend Developer Intern*

– Developed scalable backend modules for an e-commerce platform using Django and PostgreSQL.
– Integrated SMTP-based OTP login, Google OAuth2, and PhonePe payment gateway.
– Automated background tasks and cron jobs using Celery and Redis.
– Contributed to building maintainable, production-grade architecture.

**Freelance Developer**                                                      Jun 2025 – Present
                                                                                            *Remote*

– Created a Telegram-based ordering system with Django and Telegram Bot API; enabled product/category flows with automated data capture.
– Developed an event management site (BLK Swingers) with Django, featuring JWT auth, SMTP OTP, and dynamic event modules.
– Delivered full-stack Django solutions with optimized performance and clean deployment.

## Projects

**Daily Thoughts – Blog Website**
*Source Code  —  Live Demo*

– Tech Stack: Django, HTML, CSS, SQLite
– Developed a full-stack blog platform with CRUD operations, user authentication, and profile management.
– Integrated features like post likes, comments, and a responsive UI for enhanced user interaction.
– Enabled admin control for managing users, posts, and content using Django's admin interface.
– Deployed the application on Render, ensuring public accessibility and seamless hosting.

**Worknet - Job Portal**
*Source Code*

– Tech Stack: Django REST API, React, Tailwind CSS, PostgreSQL
– Admins can create and manage job listings; authenticated users can apply for jobs.
– Job seekers can update, delete, and log out of their profiles.
– Fully responsive, dynamic interface built with React and Tailwind CSS.
– Seamless integration between Django backend and React frontend for efficient data handling.

## Education

**Maharshi Dayanand University**
*Bachelor of Technology in Artificial Intelligence & Data Science*
*Sept 2022 – Present*

**Oxford Senior Secondary School**
*Senior Secondary School (CBSE)*
*April 2020 - 2022*

## Certifications

**Python Crash Course, Google (Coursera)**
